ABOUT AF7

Precision. Technology. Reliability.

AF7 is a specialized zipper manufacturing brand based in Lahore, Pakistan, offering metal, aluminium, nylon, and Vislon zippers along with selected garment accessories.

Our manufacturing facility combines modern machinery imported from China with integrated in-house production capabilities. From zipper tape making and teeth manufacturing to finishing, assembly, quality inspection, and packing, key stages of production are managed under one roof.

We focus on precision manufacturing, consistent product quality, refined finishing, and reliable service to meet the requirements of garment manufacturers, fashion brands, and apparel businesses.

OUR PHILOSOPHY

Precision in every detail.

MANUFACTURING

From tape to finished zipper.

AF7 operates an integrated manufacturing process that provides greater control over production, finishing, and product consistency.

01

Tape Making

Production of zipper tape forming the foundation of the finished zipper.

02

Teeth Manufacturing

Manufacturing and forming zipper teeth according to the required type and size.

03

Plating

Application of selected surface finishes to applicable metal zipper components.

04

Lacquering

Controlled surface treatment for the required appearance and finish on applicable products.

05

Waxing

Wax treatment for applicable constructions to support smooth zipper operation.

06

Assembly

Modern assembling machinery brings tape, teeth, and components together into complete zippers.

07

Finishing & Quality Inspection

Checking construction, appearance, finishing, operation, and conformity with agreed requirements.

08

Packing & Delivery

Completed products are prepared, packed, and organized for delivery according to customer requirements.

TECHNOLOGY & MACHINERY

Modern machinery. Controlled manufacturing.

AF7 is equipped with modern machinery imported from China, including advanced automated zipper assembling equipment. Our production setup supports efficient manufacturing while maintaining close control over key production stages.

- Modern technology
- Controlled processes
- Skilled manufacturing

Together, these work to achieve consistent products and dependable production results.

FINISHES

Finishing that completes the product.

The finish of a zipper contributes significantly to the appearance and character of the finished garment. For applicable metal zipper constructions, AF7 offers a range of finishing options:

Antique Silver

Antique Brass

Golden Brass

Shiny Silver

Antique Copper

Dull Silver / Matt Silver

Gun Metal

Shiny Black

Shiny Gold

Shiny Nickel

Finish availability may vary according to zipper type, material, and production requirements. Swatches are indicative only.

QUALITY

Quality in every stage.

At AF7, quality is considered throughout the manufacturing process. Our quality focus includes:

01 Product construction and teeth alignment	02 Zipper assembly and operation	03 Surface appearance and finishing
04 Product consistency	05 Compliance with agreed specifications	06 Final inspection and packing

> Our objective: To deliver products that combine reliable functionality with consistent appearance and finishing.

CUSTOMIZATION

Built around your requirements.

Every garment has different design and fastening requirements. AF7 works with customers to identify suitable zipper types, sizes, materials, finishes, colours, and specifications according to the intended application.

Your requirements.
Our manufacturing expertise.

WE CAN DISCUSS

- Zipper type and size
- Metal or aluminium construction
- Nylon and Vislon options
- Tape colour and specifications
- Applicable finishes
- Product configuration
- Packing and order requirements

APPLICATIONS

Designed for modern apparel.

AF7 zipper solutions can be used across a broad range of garment and fashion applications, including:

01 Apparel & Fashion	02 Denim & Jeans	03 Jackets & Outerwear	04 Casualwear
05 Sportswear	06 Bags & Accessories	07 Footwear	08 Garment Tags & Drawstrings

The appropriate zipper construction is selected according to the design, material, function, and requirements of the finished product.

WHY AF7

One manufacturing partner. Multiple solutions.

01 **Integrated Production**
Key manufacturing stages are managed in-house, providing greater production control.

02 **Modern Technology**
Advanced machinery imported from China supports manufacturing and automated assembly.

03 **Diverse Product Range**
Metal, aluminium, nylon, and Vislon zippers, supported by tag strings and tipping solutions.

04 **Controlled Finishing**
Applicable plating, lacquering, and waxing processes are integrated into production.

05 **Quality Focus**
Attention to construction, finishing, functionality, and agreed product specifications.

06 **Customer-Focused Manufacturing**
We work closely with customers to understand requirements and deliver suitable solutions.

DIRECTION

Where we are going.

OUR VISION

To establish AF7 as a trusted and internationally competitive zipper manufacturing brand, recognized for precision, consistent quality, modern technology, and dependable customer partnerships.

OUR MISSION

To manufacture and deliver reliable zipper and garment accessory solutions through modern technology, integrated production, controlled processes, and continuous attention to customer requirements.

OUR COMMITMENT

Excellence is created through the details.

At AF7, we believe that excellence is created through the details. Every tape, tooth, finish, assembly, and final inspection contributes to the quality of the finished product.

We continuously focus on improving our manufacturing processes, maintaining product consistency, and delivering solutions that meet customer expectations.
